Communicate with scientists
myScience® is a news and service network for researchers, engineers and academics. It gives an overview of science and research, universities, R&D companies and corporate research centres. myScience provides latest scientific news and events, as well as practical information on employment and daily life. myScience offers a science job-portal and career guidance.
Media Data
The myScience network has a high number of visitors per month, and this number is constantly increasing. The high number of page views per month makes myScience an attractive medium for advertisers and sponsors in research and innovation. myScience users represent a specific target group with a high level of education, working in highly qualified positions, often in a leading role.

Network

- Unique visitors per month: **60,000**
- Page views per month: **180,000**
- Total newsmails sent per month: **4,000**
